Why this works.

An event data recorder is now required to be readable in every vehicle that is equipped with one. An event data recorder can provide vital information about a motor vehicle collision including:

- Change in Velocity
- Number of Occupants
- Usage of Seatbelt
- Airbag Deployment
- Steering Wheel Angle
- Seat Position

Cost for Service

Vehicle Download after Crash: \$250

Vehicle Report: \$500

What You Get

1. CDR Download
2. CDR Report
3. 1 Medical Opinion of Injury

Scientific Research has shown that up to 38% of individuals involved in motor vehicle accidents at speeds as low as 4 km/hr sustain injury. Why preform an Accident Reconstruction, when your clients vehicle can provide you with the Crash Metrics of the Collision.
